

Problem-Solution Fit

Date	24 June 2026
Team ID	SWTID-2026-5853
Project Name	A Comprehensive Measure of Well-Being (Human Development Index Prediction)
Maximum Marks	3 Marks

Problem-Solution Fit Canvas:

Section	Content
1. Customer Segment(s)	Government Policymakers Researchers Development Analysts NGOs Students
2. Problems / Pains	Manual HDI calculation is difficult. Large socio-economic datasets. Time-consuming analysis. Limited prediction accuracy.
3. Triggers to Act	Need fast HDI prediction. Policy planning. Academic research. Country comparison.
4. Emotions	Before: Confused, Uncertain After: Confident, Informed, Satisfied
5. Available Solutions	UNDP reports, statistical tools and public datasets. Cons: Manual, slow, limited prediction.
6. Customer Limitations	Limited technical knowledge. Budget constraints. Incomplete datasets.
7. Behavior	Collects country data. Analyzes indicators. Generates reports.
8. Channels of Behavior	Online: HDI Web App, UNDP, Kaggle Offline: Government offices, Universities
9. Problem Root / Cause	Complex relationship among HDI indicators. Manual processing. Lack of predictive analytics.
10. Your Solution	Machine Learning based HDI Prediction System using Python, Flask, Scikit-learn, Pandas, NumPy, Matplotlib and Seaborn to predict HDI categories and generate reports.
