

Project Executable Files

Date	28 June 2026
Team ID	Your Team ID
Project Name	A Comprehensive Measure of Well-Being (Human Development Index Prediction)
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	N/A
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	N/A
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

hdi_predictor/

```
|
|
|— app.py          # Main Flask application
|— config.py       # Configuration settings
|— models.py       # Database models
|— requirements.txt # Python dependencies
|— README.md       # Project documentation
|— .env.example    # Environment variables
|
|— data/
|   |— HDI_Dataset.csv
|   |— processed_dataset.csv
|
|— instance/
|   |— hdi.db
|
|— ml/
|   |— train_model.py
|   |— predict.py
|   |— preprocessing.py
|   |— model.pkl
|   |— scaler.pkl
|
|— static/
|   |— css/
|   |— js/
|   |— images/
|   |— uploads/
|
|— templates/
|   |— index.html
```

```

|   |—— login.html
|   |—— register.html
|   |—— dashboard.html
|   |—— predict.html
|   |—— result.html
|   |—— history.html
|   |—— countries.html
|   |—— model_info.html
|   |—— profile.html
|   |—— about.html
|
|—— tests/
|   |—— test_prediction.py

```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	
Login Credentials (Demo)	Email:manosh@gmail.com Password:manosh
Platform / Hosting Provider	[e.g., Render, Vercel, AWS, Heroku, Azure]
Repository Link	https://github.com/ManoshReddy01/hdi_score_prediction
Demo Video Link	

RUN INSTRUCTIONS:

Pre-requisites:

Python 3.x, Flask, pip

1. Clone the repository.
2. Install dependencies: `pip install -r requirements.txt`
3. Configure .env if required.
4. Run: `python app.py`
5. Open <http://127.0.0.1:5000>

KNOWN ISSUES:

1. Prediction accuracy depends on dataset quality.
2. Initial model loading may take a few seconds.
3. Heavy concurrent requests can increase response time.
